Instructions

Fill the spaces in the grids with monsters. The digits outside the grid represent how many monsters are seen from that point looking into the grid.

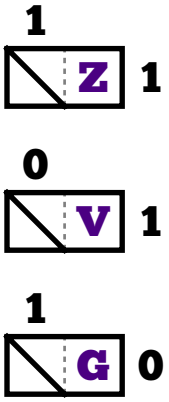
Zombies are always seen.

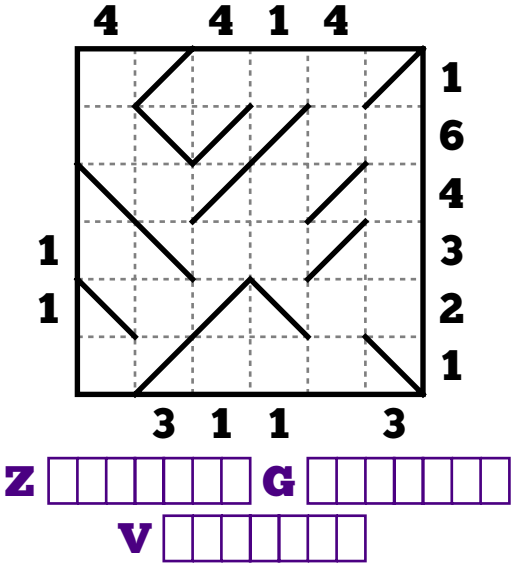
Vampires are not reflected but may be seen head-on.

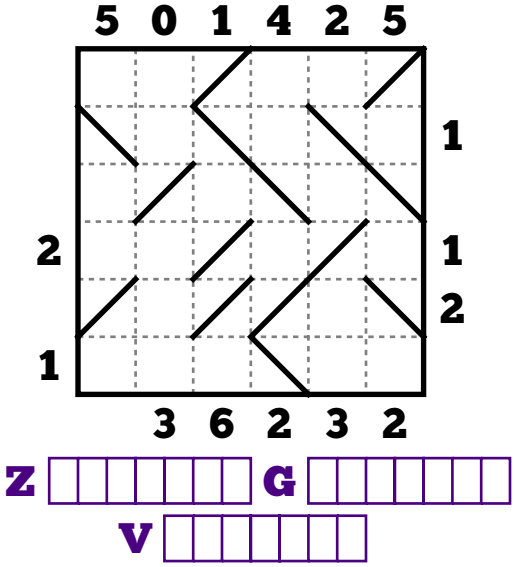
Ghosts are only seen in mirrors as reflections, but never head-on.

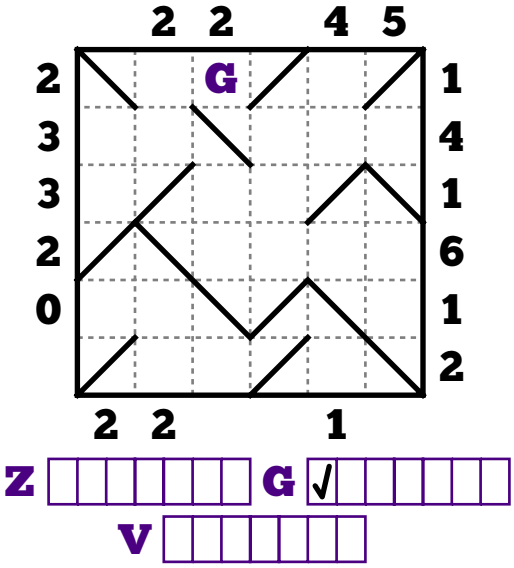
Spaces have been given to check off monsters as used in each grid. Some have been given to start you off.

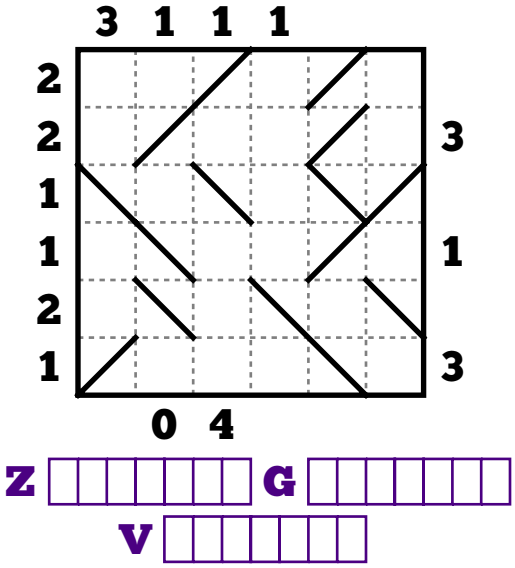
Examples

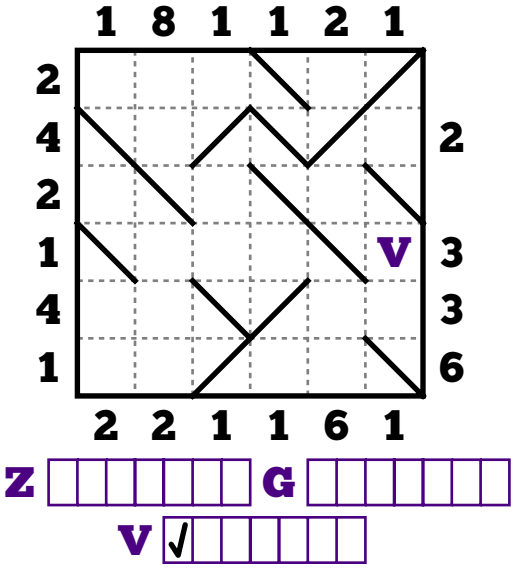


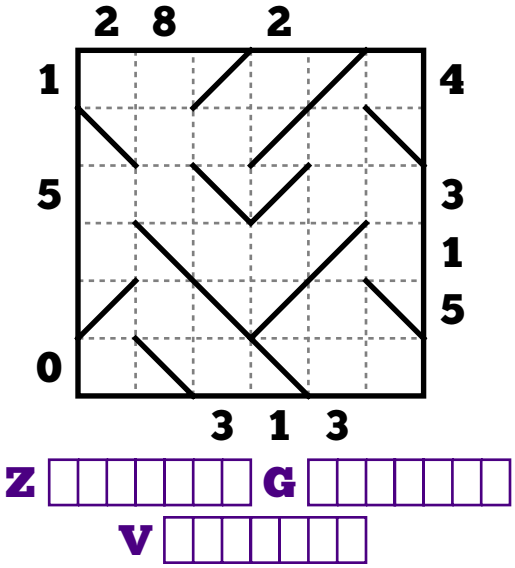
Backed By












I dedicate these puzzles to Kickstarter backers Joe G., Michael S., Michael M., David N., Degnan H., and Robert G! Thanks guys!
