

March 9

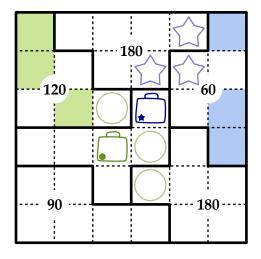

In these puzzles, fill the grid with digits from 1 to 6. Each 6 square row, column, and shape should contain each digit 1 through 6 once.

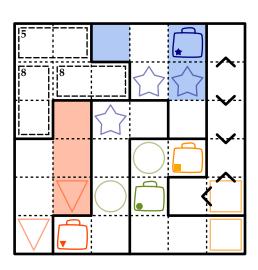

Puzzle created by David Millar. You can head over to http://www.thegriddle.net to find more puzzles like this for free. You should get updates via Twitter at @thegriddle (http://twitter.com/thegriddle) and/or grab our RSS feed from the site.

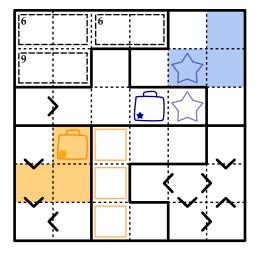

The briefcase: the digit in the briefcase is the sum of the numbers from the matching shapes.
