

Instructions

Create a loop through the grid at right following the clues given.

Circled number pods are Corral-style clues. The pod cells must be inside the loop and the number tells how many cells can be seen up, down, left, and right (plus itself) from that cell before reaching a wall.

Cacti cells must be on the outside of the drawn loop. Aliens must be inside it.

The fence must run through all circles (Masyu-style clues). On darkened circles the fence must have a 90 degree turn with straight sections before and after. On white circles the fence must continue straight with a turn before and/or after the circle.

Cells with an uncircled 0 or 3 must be surrounded by that number of fences.

Backed By

This puzzle was selected by Paranormal Puzzle Pack Kickstarter backer Michael as his custom puzzle!

The puzzle grid is a 20x20 square. It contains several types of clues:

- Circled Numbers (Corral-style clues):** These are placed in cells and indicate how many cells are visible from that cell in the four cardinal directions (up, down, left, right) before hitting a wall. Values include 3, 6, 9, 12, and 15.
- Uncircled Numbers:** Values of 0 or 3 are placed in cells, indicating the number of fences that must surround that cell.
- Cacti:** Represented by a stylized cactus symbol, these must be placed on the outside of the loop.
- Aliens:** Represented by a stylized alien head symbol, these must be placed inside the loop.
- Fence Symbols:** Represented by a circle, these indicate where the fence must pass through. Darkened circles require a 90-degree turn, while white circles require the fence to continue straight.
