Instructions
Create a loop through the grids at right following the clues given.

A cell containing a digit must te surrounded by that many pieces of fence.

Circled number pods must be inside the loop and show how many cells can be seen up, down, left, and right (plus itseff) from that cell before reaching a fence.

In this variant, every single intersection MUST be used in building the fences.

On darkened circles the fence must have a 90 degree turn with straight sections hefore and after.

On white circles the fence must continue straight with a turn before and/or after the circle.

Backed By
This puzze is dedicated to two of my Paranormal Puzzle Pack Kickstarter backers, David M. and Sandor W! Thanks again!
