

thegriddle

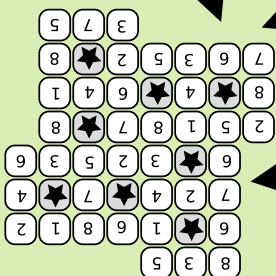

puzzles by David Millar

Here's a sample Loop de Loop Puzzle for everyone to try. If you'd like to try some more of these puzzles, search the archives of the griddle and keep watching for updates. Soon, there will be a few new Loop de Loops of mine in a puzzle magazine. When I get the details, I'll post a link for my griddle friends and visitors to find and buy the magazine online.

To play:
Fill the grid at left. Each star must be surrounded by each digit from 1 to 8 with no repeats.

Answer Key
