

Area 51

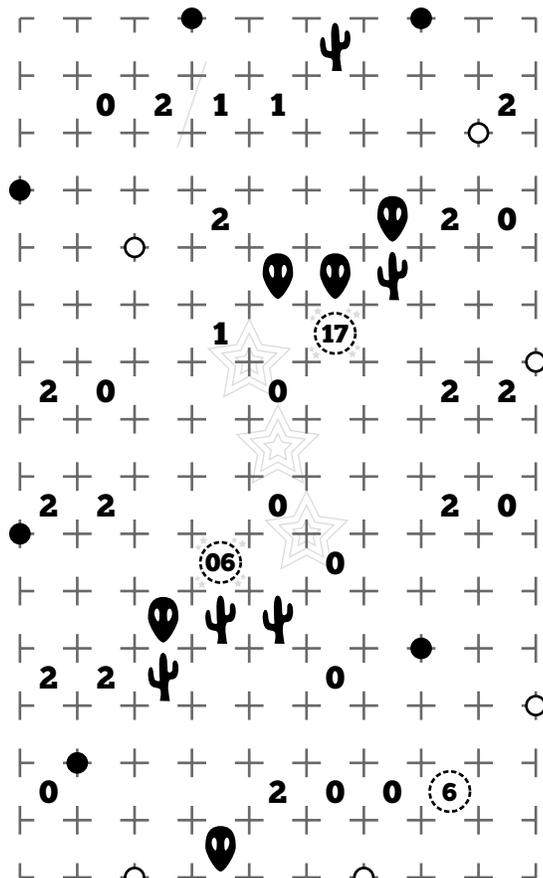

In each of the puzzles, draw a continuous fence loop that follows the grid lines and does not branch or intersect itself. Additionally, plain numbers in the grid function as slitherlink clues, numbers in dashed circles represent corral clues, shaded and unshaded circles represent masyu clues, cacti must be located outside the fence, and aliens must be kept inside the fence.

Thank You

This is post #1000 (give or take some database cruft and such) and today The Griddle turns 20 years old.

I scheduled the day off from work and hoped to get up at the usual time, spend the morning making more puzzles for this sheet, and having a more substantial post to put up. But lately the world has been taken over by terrible people, and the stress has been affecting my sleep and ability to write puzzles. So I slept in quite late. My body decided it needed it, and I listened to it.

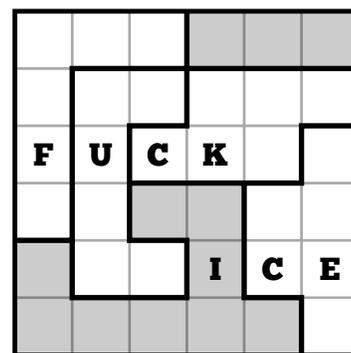

Thanks for dropping by today and all the visits in the past. Keep on checking in. More puzzles, probably. Eventually.

For now, I'm off to get ready for bed.

Shape Sudoku

Place each letter into each row, column, and 6-square shape without repetition.

This was supposed to be a regular shape sudoku puzzle, but some innocent families were needlessly torn apart.
