

In these puzzles, fill the grid with digits from 1 to 6. Each 6 square row, column, and shape should contain each digit 1 through 6 once.

Puzzle created by David Millar in 2006, *updated March 8, 2010*. Go to <http://www.thegriddle.net> to find more puzzles for free. You should follow me on Twitter at @thegriddle (<http://twitter.com/thegriddle>) and/or grab our RSS feed.

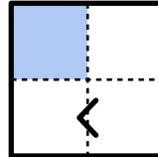

*The briefcase:* the digit in the briefcase is the sum of the numbers from the matching shapes.
