## \*pentomino crosswords\*

Use the clues below each grid to fill the grid with letters. The numbered clues correspond to the words in the rows with 4 letters (or 7 for the middle row). The clues given a letter or letter number combo correspond to the shapes in the grid containing 5 letters. Words inside shapes usually follow a logical order - in most cases from left to right starting with the topmost squares and ending at the bottom, or from the first square in a chain to the last.

This puzzle was created using Google Docs & Spreadsheets. Their PDF creation mechanism adds gray lines to the PDF file, but other than that it is a great tool to use.
