

Sorry about the mistakes – e-mail me if you find one!

Fixed 3/24/08

The grids below represent top-down views of mirror mazes containing mirrors and people. Four patrons from each maze are vampires – that is, their reflections cannot be seen in the mirrors of the maze. The number outside the maze represent the number of people seen when peering into the maze – use these to identify the vampires!

The two shaded squares in the second puzzle below should both have the same type of person – vampire or human.
