

In the grid below, enter zeroes, twos, and fives so that the numbers outside the grid are the sums of their respective rows or columns. Distinct shapes may only contain one number – so a shape with two squares must contain either two zeroes, two twos, or two fives.

	7	16	11	17	12		12	14	17	6	12		14	9	7	11	20
8						17							14				
17						14							12				
22						12							9				
7						12							12				
9						6							14
