

Sudoku Mix

Dice Sudoku: The dots in the squares represent the dots on a die. The numbers 1-4 fit into the grid so that each row, column, and shape have 1-4. Note that a single center dot could be 2 OR 3, and a pair of two corner dots could be 2, 3, OR 4. The star is 1.

1-5 Sum Sudoku: Each row and column has exactly 1 through 5. One box in each row and column has 2 digits in it. Each shape has no repeating digits and the sum of the digits is the small number in the corner.
