

Oddly Even

Created 3/9/08

A logic puzzle from thegriddle.net by David Millar

X

Use the clues to fill the grid with digits from 1 to 5.

■
X

Each section of a row or column between black squares or walls may only contain each digit once.

X
X

The numbers inside the grid list the number of adjacent cells that will contain an even number.

X
X

The numbers outside of the grid list the sum of the entire adjacent row or column.

Hey! This is a pretty small puzzle. You should print it on a half sheet of paper!
Don't forget to recycle it when you're done!
