

Five friends decided to take their respective bus routes to the mall to meet for cookies and a mini shopping spree. To solve this puzzle, use the clues to figure out which of the 5 friends took which bus, and which cookie each ordered.

	Route 5	Route 6	Route 17	Route 28	Route 49	Brownie Button	Chocolate Chip	Mini Choc. Chip	M & M	Peanut Butter
Angie										
Beth										
Clarissa										
Dodie										
Elena										
Brownie Button										
Chocolate Chip										
Mini Choc. Chip										
M & M										
Peanut Butter										

Angie, who did not get the brownie button cookie, took either route 17 or 28.

Dodie, who had either the chocolate chip or mini chocolate chip cookies, took either route 6 or 17.

Elena did not get the peanut butter cookie, nor did she take route 5.

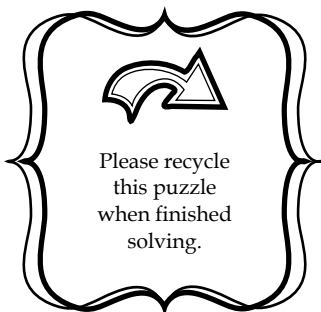

Clarissa did not take the bus from route 49, nor did she order the M & M cookie.

The route number from Beth's bus was higher than the route number from Angie's bus.

The friend who bought the chocolate chip cookie took a bus whose route number was higher than Elena's bus route number.

Beth had the chocolate chip cookie.

The person who took route 6 had the M & M cookie.
