

In the puzzle 0-2-5 Soup, you must solve the 0-2-5 puzzle grid using the Number Soup pieces given. The clues along the top and left of the grid are the sums of the numbers in that row or column. The shapes may not be rotated or reflected and must fit into the grid without overlapping each other or going out of the boundaries of the grid.

More grid based logic puzzles like these (including 0-2-5 and Number Soup) can be downloaded for free on the Internet at The Griddle (<http://www.thegriddle.net>).
