

the griddle Pointers

July 3
2009

Fill the grids with each digit from 1 to 9 with no repeats and none missing.

The arrows point (in multiples of 45 degrees) in the direction of the cell with the next highest digit: 1 points to 2, 2 points to 3 ... 8 points to 9, and 9 points to 1. Some boards also contain row and column sums above and to the left of the grid and box sums in the top left corner of the boxes.

Created by David Millar. See more at <http://www.thegriddle.net>.
