

Instructions

Use the sums given to fill the grid with the digits 0, 2, and 5. Each shape must contain the same digit throughout.

Errata

The top left puzzle had 15 as the left-most column's clue, when it should have been a 10. Now fixed thanks to a tip from David Uhland.

Extra

The bottom two puzzles are new and have been made and added specially for this remade puzzle sheet.
