

the griddle Pointers

September 24
2009

Fill the grids with each of the 26 letters from A to Z with no repeats and none missing.

The arrows point (in multiples of 45 degrees) in the direction of the cell with the next letter: A points to B, B points to C ... Y points to Z, and Z points to A. Created by David Millar. See more at <http://www.thegriddle.net>, follow us on RSS or by e-mail subscription, and follow me on Twitter at @davemillar.
