

Fixed 2/7/2010 Thanks to Dr. Gareth Moore

For each puzzle, draw a single closed loop along the grid lines using the clues given. The loop must not have any intersections with 3 or more line segments and must not have any dead ends with a single line segment coming to a halt.

The numbers in the squares represent how many line segments from the loop must surround the square when the puzzle is solved.

The path must travel through each bullet hole. It must make a 90 degree turn at each black bullet hole. It must go straight through each white bullet hole, but must make a turn before and/or after the hole.
