

the griddle X and O

January 23
2010

For each puzzle, determine the string of X and O characters that each letter represents. You will be given some strings of letters that equal a string of X and O characters.

Some puzzles may contain multiple strings. No two letters can represent the same X and O string. An example is given below to show you how the puzzle works.

These puzzles were created by David Millar. Find more free puzzles online at thegriddle.net and get updates on new puzzles by following @thegriddle on Twitter or subscribing to the RSS feed.
