In these puzzles, fill the grid with digits from 0 to 6. Each row and column (and shape, in the case of the bottom puzzles) of each grid should contain each digit 0 to 6. Split cells must contain 2 digits instead of 1.

Puzzle created by David Millar. More puzzles can be found on <http://www.thegriddle.net>.

*Fixed 7/5/2010.*

**The shaded section** in this puzzle is a disjoint set that must also contain the digits 0 to 6.
