

# the griddle Kakuro

March 19  
2006

In Kakuro, place digits from 1 to 9 between black cells such that there are no repeat digits and the digits add to the given sum. Star cells should contain the same digit within their puzzle.

Original puzzle created by David Millar and posted March 19, 2006.

Fixed, added upon, and reposted January 6, 2010, thanks to Josh! ★
