

This is a prize puzzle!
You can win a free copy of **Haunted Mirror Maze** for your iPod Touch or iPhone!

To enter to win, solve the puzzles and submit your answer as a comment on the page for this puzzle by **11:59 PM EST April 4, 2010**.

Solve the 3 **Haunted Mirror Maze** puzzles on the left. They have 5 vampires each and 5 aliens each.

Vampires can be seen 1x head-on and 0x reflected in mirrors.

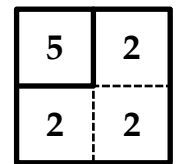

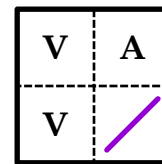

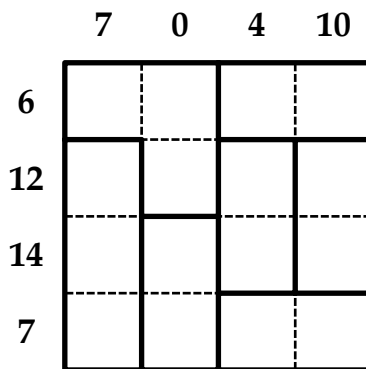

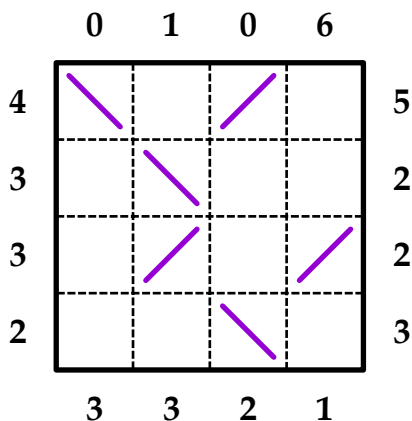

Aliens can be seen 1x head-on and 2x reflected in mirrors.

Solve the 3 **Mirror 0-2-5** puzzles on the right. Each puzzle has 1 shape filled with mirrors (they must face the same way).

Once the puzzles are all done, match letters on the left with digits on the right. Find the sum for each monster to determine which monster has the biggest sum and wins!

The **winning monster** is the answer to the prize puzzle. Submit it through the comment form on the puzzle page and be sure to include your e-mail address so I can contact you if you win!

Example. $Sum(V) = 7$, $Sum(A) = 2$. Vampires win.
