## Knighted Sum Sudoku

April 26  
2010

9	13			10		10	16	
		13	7		15		7	
9			12			11		
24			8		8		7	
	15	5	12	16		11		11
						15		
11			15	17		5		11
5		14		12		13		
14							15	

2, 3, 4, 5, 6, 7, 8, 9

	11	9	15	5		15	13	
9					12		9	7
	15		12					
17		10		13		11		10
	17		11			8	15	
				11				
6		10		13		15		11
14	14		11		15	6		
			5				12	

Example Knight

In this puzzle, fill each row, column, and 3x3 square with one of each number with no repeats and make sure the given sums are satisfied.

The knight squares count for 0, and display the sum of the squares within the knight's attack range (the squares it could attack in a game of chess).
