A group of 5 friends went on a road trip in an RV. Their destinations: 5 small out-of-the-way towns each with a roadside attraction/tourist trap turned destination, each with a place to swim, each with a silly kitschy t-shirt at the gift shop, and each with a great little dive restaurant that has a special you can't find anywhere else.

Ready to piece their trip back together? Use the clues on page 2 to match up who picked each of the destinations with their respective locations, food, t-shirts, and swimming spots.

In this puzzle, use the clues given to figure out which of the customers had which orders, and the items in each order. The **logic grid has been given above to help sort out the puzzle's possible combinations.**

Clue 3: The outdoor pool was in the town where the "pile-it-on" loaded fries were on special, which is not what Rafael picked.

Clue 4: Marco either picked the town where stew was on special and there was a water park at which to swim, or Teriville (home of The Purple Duck restaurant) but not both.

Clue 10: Peter did not pick the town where Eat 'n' Go is located.

Clue 11: Nadia did not choose St. Joseph or the place with red shirts.

Clue 15: The white t-shirt and super beefy stew were from the town where either a water park or lake were available for swimming.

Clue 16: The steak sandwich was not the special in Landon or Mabel Hill.

Clue 17: Either Peter or Rafael picked St. Joseph, but neither picked green shirts or the town with the chili dogs.
