

In each puzzle, fill each row and column with digits from 1 to 6 with no repeats in a row or column and the given section sums satisfied.

Each puzzle has a section with sum 22 because today is my 22nd birthday.

If you enjoy my puzzles, it would be a great birthday gift to either buy me a cup of coffee through the PayPal link on <http://thegriddle.net>

Alternately, you could support the puzzles I make by buying the Haunted Mirror Maze iPhone app. It's only \$1 right now, and comes with 50 puzzles - more soon. See screens & more at <http://thegriddle.net/haunted>

Puzzles created by David Millar. For more puzzles like this go to <http://www.thegriddle.net> where you can also get e-mail and RSS updates. Get updates and talk to the author over on Twitter with [@thegriddle](http://twitter.com/thegriddle) over at: <http://twitter.com/thegriddle>

Corrected 6/10/10 thanks to Gary.
