

Instructions

Complete the 5 overlapped sum sudoku puzzles using normal sudoku rules, but excluding the digit 1.

The knights in the grid display the sum of digits in that knight's chess attack range - any cell within a 2 by 1 L-shaped move from the knight. An example is shown below.

	8		15	16	14		9				15	10	15	7			9	10		
16		14	8		26									10		16		20	8	
	22		8				15							7		24		17		
10		9	8	17		16	22					11		32		10		8		11
9	17			10			5					8	15		26		7	15	10	
			9		51		14						10		10					18
8		43	16	8		15			15	8	29	8	13	12	16	8	49		14	
13	13			12	8	9		44			10						12	36		11
	10		13				14		11			33	11		8			36		12
				9	17		12	44					5							
					8				17	7										
				28																
11		21	11	11		15		9	7		14	10	41	12		6		13	12	
13	5			11	11	9		27		14					9	17		28		13
	15		35			11			23	9								41		6
11		12	16	10	10	41	5	13												15
26							13					27			12		15	5	16	
	10		8		22		13						10			36			9	
	19	9	6	13		13		15					15		41	15			5	
17				25	8	5	11						12		35	13	5		14	13
	13		17						7					10			11			9
