

## Instructions

Complete the puzzles at right using the Slitherlink and Corral clues given.

Each cell with an uncircled 3 must have 3 walls around it. All other cells must have fewer than 3 walls.

Circled numbers represent Corral clues; the cell must be inside the loop and the number tells how many cells can be seen up, down, left, and right (plus itself) from that cell before reaching a wall.

## Errata

The rules for cells without an uncircled 3 have been clarified thanks to a comment from Paul.

Thanks also to Nancy B. and Martin who each sent in comments after finding a flaw. Both flaws have now been fixed.
