

Instructions

A fence has been put up along part of the border.

Use the clues to figure out where the fence is located. The digits in the grid show how many pieces of fence surround the cell.

All the cells in this puzzle that can have a 3, do. All others must have fewer than 3 fence pieces.

The fence has no dead-ends or intersections and only goes from the top to the bottom of the grid.

It Came from Del Rio by Stephen Graham Jones is coming to Trapdoor Books very soon:
