

## Instructions

Place digits 1 to 9 into each row, column, and 3x4 box while obeying the sum sudoku cages and chess piece sums.

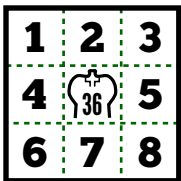

Each white chess piece will display the sum of the cells in its attack range:

Knights attack any cell within an L-shaped 1x2 move from its cell.

Bishops attack diagonally from their cells up to the grid edge or another piece.

Kings attack any cell directly around their cell.

17		17	11	7			16	15			
		36					7		28		
		8					17				
14	9	13					7		15		
9				22	23					3	
			19	4		6				11	
17				18		4				22	
6	18					11		4			
										17	
	7			13					13	43	7
14				11		15	6			19	
		14			15			7			

## Errata

The bishop in row 6, column 4 was previously labeled 17, but is now (correctly) labeled 19. Thank you to the puzzler who found this mistake and pointed it out.
