

Introduction

The Infernal Rackets at the Key Deze Arena might have a pretty ridiculous rider, but so does Radioactive Child - and they have refused to perform until you get their demands for snacks and reading material met!

Instructions

There are some rumors floating around that can help you solve your rider conundrum, but some of them are a load of crap.

Solve the 3 puzzles on this page first. Each correct solve will direct you to a bogus clue on the next page to cross out.

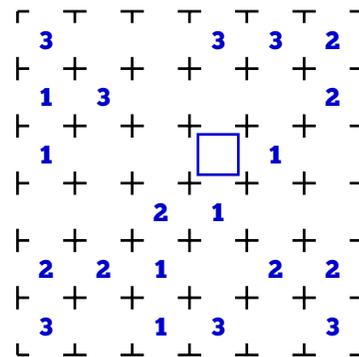

Finally, solve the logic puzzle about the band on the next page. A correct answer will spell out the name of an item in KoL.

Send a K-Mail (green msg) to dreamisle (#637914) with the name of the item you get from the final puzzle. The first 100 or so users to do so get that item. A drawing will also be held on January 29th after rollover for a larger prize.

Fence Your Campground

At right is your campground. You must make a single loop of fencing around the campground with no intersections or dead-ends. The fencing must follow the grid lines and each numbered square must have as many pieces of fence around it as the number in the square.

If the marked cell is **INSIDE** the loop, cross out clue I. If **OUTSIDE**, cross out clue O.

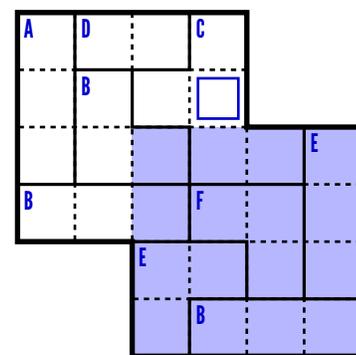

Clockwork Overlap Killer Sudoku

Solve the two overlapping 4x4 killer sudoku grids at right by placing an item into each cell: Cog (C), Spring (S), Sprocket (R), Flange (F)

Each row and column of each 4x4 grid should have 1 of each item, and the items placed into the bordered cages must form the item listed.

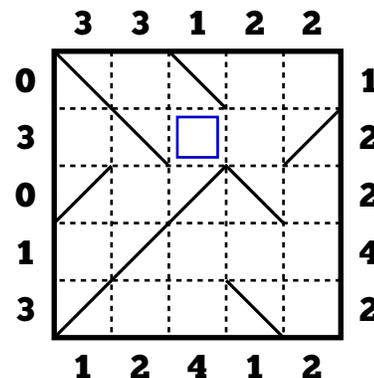

A: Clockwork Thingamajig B: Clockwork Widget C: Clockwork Claws
D: Sprocket Assembly E: Clockwork Dooickey F: Cog and Sprocket Assembly

Haunted Mirror Maze

Place 5 of each monster in the grid. When solved, the digits outside the grid count the number of figures seen from that viewing point looking into the row or column. Mirrors inside the maze reflect a line of sight 90 degrees, as with a laser.

Vampires (V) are seen only head-on (have no reflection in a mirror).
Spectres (S) are only seen as reflections in mirrors (not head-on).
Zombies (Z) are always seen.

But wait, there's more!

The meta logic puzzle is over on page 2!

Answering the Meta Puzzle

For each of the three puzzles above, take the answer from the cell with the blue square in it and cross out the corresponding clue on page 2. The remaining clues should yield the solution you're looking for.

Finale

Now that you have the right clues, figure out what the members of the band Radioactive Child want to solve the meta puzzle!

Story Logic: Radioactive Child's Rider

Using the clues you've found to be true, match up each band member with their role in the band, their reading material of choice, and their preferred snack.
