

Instructions

Each of the 5 overlapping 9x9 sudoku puzzles follow normal rules with a special set of clues.

All consecutive pairs are marked with a rectangle. Other pairs of cells may be marked with a greater-than symbol to denote which of the two digits is larger.

The image shows a Samurai Sudoku puzzle grid. It consists of five overlapping 9x9 grids. The grid is divided into five 9x9 regions by thick black lines. The regions are arranged in a cross shape: a top-left 3x3 block, a top-right 3x3 block, a middle 3x3 block, a bottom-left 3x3 block, and a bottom-right 3x3 block. The central 3x3 block is shared by all five regions. Clues are placed in the cells of the grid, including rectangles and greater-than symbols (>).
