

Instructions

Today's piece uses greater-than symbols as clues.

Place the shape sudoku lines and clue symbols into the grid marked '1' on your advent calendar sheet, and proceed to solve (as much as is possible) using those clues.

Throughout the coming days leading to Christmas, new pieces will be posted to add to the overall puzzle. Sometimes, you may be able to solve the full grid based on the clues given. Other times, the grid may not be solvable until later grids are unlocked.

Greater-Than

In this grid, greater-than symbols are given between cells to denote which of the two cells should contain a greater digit.

Errata

I mistakenly left the wrong instructions here instead of adding the information about using greater-than symbols. Fixed thanks to a tip from Dr. Gareth Moore.
