

Instructions

In each shape sudoku grid, fill each row, column, and dark-outlined shape with one of each digit from 1 to 9 with no repeats.

In addition to a handful of givens, the puzzles contain two clue types:

An X denotes a pair of cells that sum to 10.

A bar denotes cells which contain consecutive digits. (e.g. 1/2, 2/3 ... 8/9)

Errata

The top right puzzle was originally missing a clue for a consecutive pair, but is now fixed thanks to a tip from Nancy.
