

Instructions

Create a loop through the grid at right following the clues given.

Circled number pods are Corral-style clues. The pod cells must be inside the loop and the number tells how many cells can be seen up, down, left, and right (plus itself) from that cell before reaching a wall.

Cacti cells must be on the outside of the drawn loop.

The fence must run through all circles (Masyu-style clues), and behave as described below:

On darkened circles the fence must have a 90 degree turn with straight sections before and after.

On white circles the fence must continue straight with a turn before and/or after the circle.
