

## Sudoku Grab Bag

June 2, 2013

http://thegriddle.net · http://twitter.com/thegriddle

## Instructions

Each puzzle is a variation on traditional sudoku, wherein your objective is to fill each row, column, and 3x3 box with the digits 1 through 9.

In the top puzzle, the three grids overlap and must be solved together.

In the bottom puzzles two additional clue types are provided:

Some colored lines split the 3x3 boxes into cages. The sum of the two digits in each cage is provided in the corner of the cage.

Some corners where 4 cells meet display the product (multiplication) of the four cells touching it.

## **Backed By**

These puzzles were chosen by Paranormal Puzzle Pack Kickstarter backers. The top puzzle is for two very good friends of mine, John and Olivia Krull.

The bottom puzzle set is for Trizm Puzzle author Andrew Blakeslee. His puzzles can be found at: http://trizmpuzzle.com/
