

## Instructions

Create a loop through the grids at right following the clues given.

A cell containing a digit must be surrounded by that many pieces of fence.

Circled number pods must be inside the loop and show how many cells can be seen up, down, left, and right (plus itself) from that cell before reaching a fence.

Cacti cells must be on the outside of the fence.

On darkened circles the fence must have a 90 degree turn with straight sections before and after.

On white circles the fence must continue straight with a turn before and/or after the circle.

## Time Off

Wondered where I was the last month or so? I moved to a new city and state to take a new job and haven't had time to work on much else. Worry not, puzzlers. I plan to resume regular posting soon.
