Instructions

Create a loop through the grids at right following the clues given.

A cell containing a digit must be surrounded by that many pieces of fence.

Circled number pods must be inside the loop and show how many cells can be seen up, down, left, and right (plus itself) from that cell before reaching a fence.

Cacti must reside outside of the fence loop. Aliens must reside inside the loop.

At shaded circles the fence must have a 90 degree turn with straight sections before and after.

At hollow circles the fence must continue straight with a turn before and/or after the circle.

In today's variant, every intersection in each grid must be visited by the loop. This variant DOES NOT apply to the Advent Calendar piece.
