

Instructions

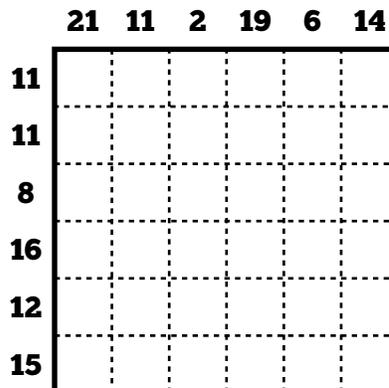

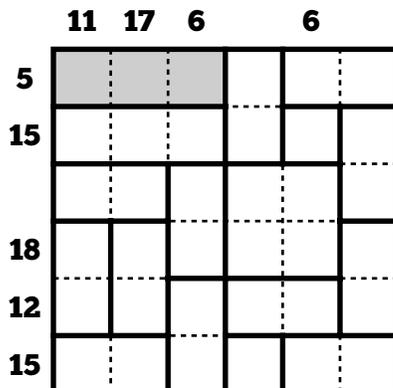

Today's bonus puzzles are 0-2-5 puzzles with shape sliding side puzzles.

In the first grid, fill each dark-outlined unshaded shape with either all 0s, all 2s, or all 5s. The shaded space is empty.

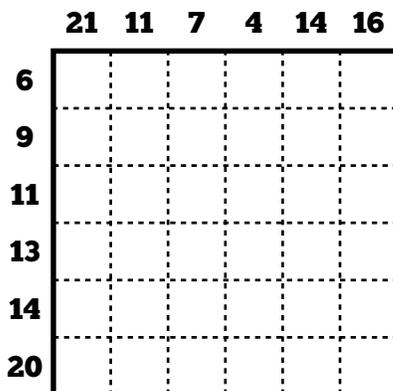

When complete, the rows and columns with clues should sum to the given number.

Then, using the clues provided, rearrange the shapes by sliding blocks orthogonally from the first grid until they fit the clues on each consecutive grid.

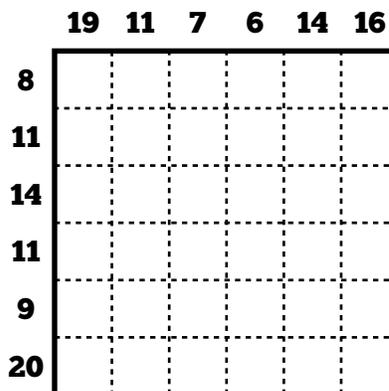

Thanks to Michael Chandra for pointing out that the third grid's second row should be clued 9, not 12 as originally written.

From first grid, Up Up, Right, Up Left, Left, Down.

From second grid, Up, Up, Left, Left, Left, Down, Down, Down, Right, Down, Right

From third grid, Right, Right, Up, Up, Left, Down
