# 2016 Day 10

Advent Pieces

Today's piece uses Kropki clues. White circles mark every pair of consecutive digits (e.g. 1 & 2, 5 & 6). Black circles mark every pair where one digit is 2x the other (e.g. 1 & 2, 4 & 8). All possible clues in this square are given. If 1 & 2 are adjacent, they may have either clue type.

Solve today's Advent Calendar square using sudoku logic!

Hints: What rows already have a 1? What row still needs a 1? What column still needs a 1?

Bonus Puzzle

Today's bonus puzzle is a maze. Help me get to the delicious taco.

By the way, I'm trying to eat one of every taco in Fort Worth, Texas. If you want to see my progress and misadventures, go to http://allthetacos.com
