

Instructions

Enter digits into the cells so each row and column has all digits 1 through 6.

Additionally, draw a single, closed loop connecting nodes along the gridlines to form the 'Times Zone'.

Clues outside each row and column label the contents of the corresponding row or column, as split into groups by the loop. They are presented in order.

Number clues represent either the sum of a group outside the loop or the product of a group inside the loop.

A question mark represents 1 group of unknown sum or product. A star represents 0 or more unknown groups.
