

Instructions

In each 9x9 sudoku grid, fill each row, column, and 3x3 box with one of each digit from 1 to 9 with no repeats.

In this variant, some cells contain an arrow clue. The arrow clues point in the direction of the cell within the same 3x3 box that must contain the next digit in ascending order. (If a clued cell contains a 9 it points toward the box's 1.)

All arrows point in either an orthogonal direction or a 45-degree diagonal.
