

**Day 4: Light (Akari)**

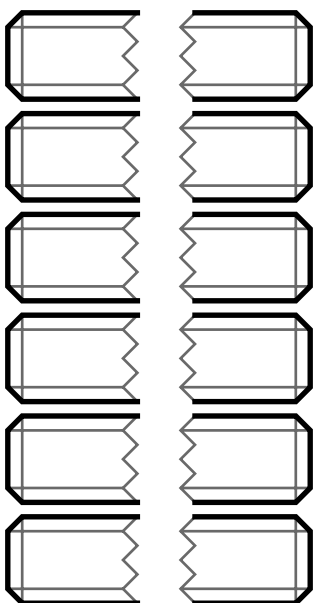

Place light bulbs into the grid to illuminate all of the unshaded cells. A light bulb illuminates cells along the same stretch of column and row between the bulb and the nearest shaded cell or edge of the grid. No two bulbs should illuminate one another, and each digit displays the number of light bulbs orthogonally adjacent to the clue's cell.

**Day 7: Arrow (Latin Square Arrow Sums)**

Place a digit from 1 to 4 and an arrow pointing up, down, left, or right in each cell of the grid. There may not be a repeated digit or arrow in any row or column, and a combination of digit and arrow direction may not be repeated. Each clue specifies the sum of the digits the displayed arrow points toward for the given row or column. (This does not include the clue arrow cell itself.)
