

**Day 8: Curse
(C@#!e)**

Hey, watch the language!
Oh, not that kind of curse?
What curse was in frequent
rotation around the time
the author finished his
freshman year of
highschool?

**Day 9: Glitch
(Glitched
Area 51)**

There's a glitch in this area
51 puzzle! There are three
white masyu pearls and
three black masyu pearls,
but their display got
glitchd and now it's up to
you to solve the puzzle
while figuring out which is
which. Additionally, the
middle of the grid got
warped and reality was
stretched. Fences that
cross the rift along the
dotted lines must do so all
the way across in one go
without turning.

Day 10: Hazard (Mini Golf)

Each cell of the grid must be filled with a diagonal
bumper, water hazard, or the hole. There is only one
hole in the grid. Outside the grid, some clues are
given based on where the ball ends up when putt into
the grid: a flag if the ball reaches the hole, an X if it
enters a water hazard, or a number if it exits the grid.
If two of a number are provided, a ball putt into one of
them will come out at the other, and vice versa.
Unmatched numbers should not use the same path.
