

Twilight Kurotto 🍌 3

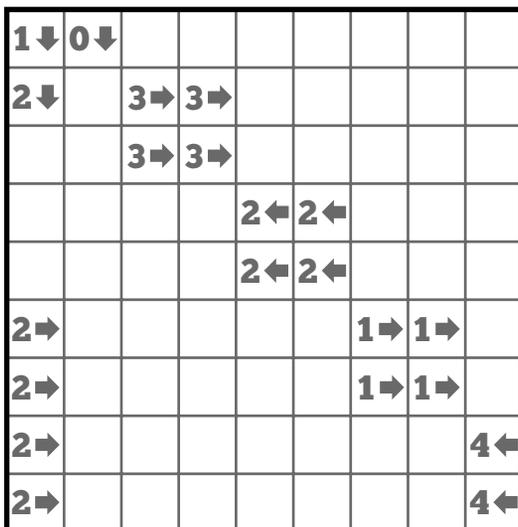

Shade some cells. White clues cannot be shaded and represent the total size of the orthogonally connected areas of shaded cells that share an edge with the clue. Black clues must be shaded and represent the total size of the orthogonally connected areas of unshaded cells that share an edge with the clue.

Statue Park 3

Shade some cells to form the provided statues in the grid. They may be rotated or reflected. They cannot be orthogonally adjacent but may touch at corners. The unshaded cells must form a contiguous region. Cells with shaded circles must be part of statues; unshaded circles must not.

Nurikabe (Full) 4

Shade some of the cells so that the grid is divided into white regions, with each cell in such a region containing a number identical to the area of the region. Two white regions may only touch diagonally. All shaded cells must be connected with each other, but no 2x2 group of cells can be entirely shaded.

Diagramless Minis

Standard diagramless crossword rules apply:

Black squares will have rotational symmetry, all words are 3 letters or longer, and no letters are unchecked.

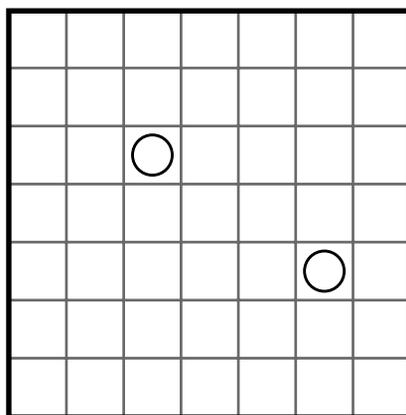

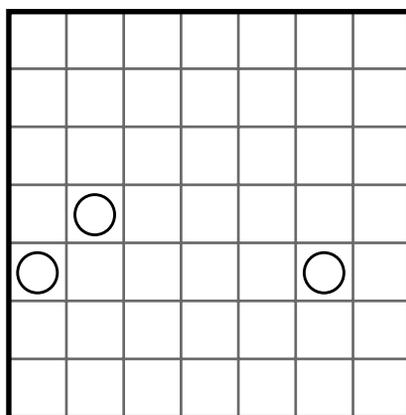

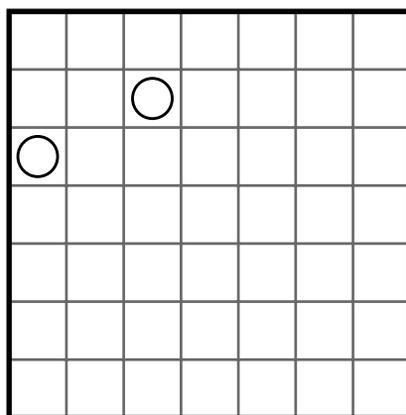

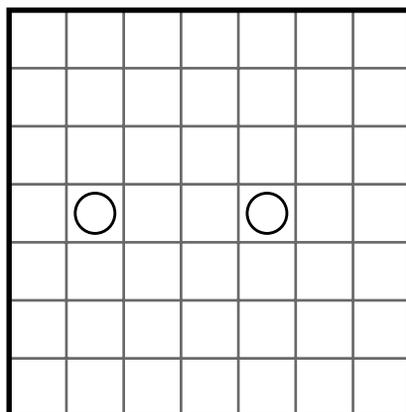

Across clues are in the correct order, but Down clues have been alphabetized.

As an additional hint, each grid will have fifteen black squares.

School Trip 🍌 3

Place numerous 1x2 futons onto the grid, with a pillow on one of the two squares. If the futon is vertical, the pillow may not be on the top cell. Circled digits note the number of pillows adjacent to them. All non-futon squares should form a shaded path. Every futon must touch the path, the path must be fully connected, and the path may not form any 2x2 blocks.

TapAqre 🍌 3

Shade some cells so that each clue is surrounded by a run of shaded cells equal to the clue value, and the region containing the clue contains as many shaded cells. The shaded cells must form a contiguous region. There may not be more than three unshaded squares in a line, nor more than three shaded squares in a line.

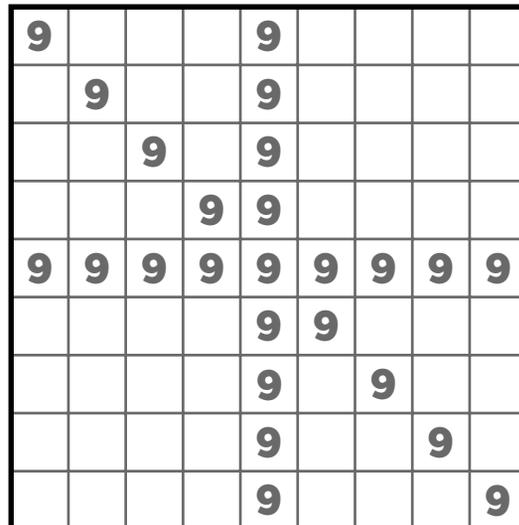

By Zimodo
