

Each shape has a value from 1 to 9. Use sudoku logic to help determine each shape's value and the values that need to go in the squares in the grid.

The digits along an arrow must sum to the digit in the circle attached to the arrow.

Anger

Dings / Some parents

"Shut up!" / Done

Stack sloppily / Mr. Simpson

Spectacle / Cast a ballot

Appeal / Provide food

Bean variety / Swimming area

Buddy

White Blooms

Preserved in a certain way
Relocation experts
Empty

Striped Blooms

_ and the Blowfish
Chest feature
Thief

Gray Blooms

Good qualities
Some flowers
Distant
Mobile computer

Today's feature puzzle is Rows Garden. Place letters into the 'petals' in the grid to form the answers to the clues. Each row contains one or two entries, and each 'bloom' contains a six-letter word surrounding its center. It's up to the solver to determine where the word starts and in which direction the word winds around the center.
