

Leg Day

Give every guy two legs of equal length. Every empty square must be used. Legs must follow the orthogonal grid and cannot cross or share space with other legs. Legs may not pass through thick borders.

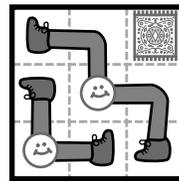

In order to keep the beautiful rugs nice and clean, legs may not go over any rugs, and no foot/shoe may be placed orthogonally adjacent to or on any rug.

(Zoom in and enjoy the pretty details of the beautiful rugs!)

True or False LITS

Standard LITS rules apply. (Check out my recent post featuring LITS at <https://thegriddle.net/997> for rules.)

If any text remains in the unshaded cells in a region, it must make a true statement.

(This was experimental, sort of a spiritual successor to the True or False Sudoku puzzle I shared in a previous Sudoku Grab Bag: <https://thegriddle.net/994>)

NO ROW	ALL SHADED				
	NO I	VERTICAL			
3 L's	IN PUZZLE			REGION	
IN PUZZLE			NO L USED	ABOVE	TO LEFT
EACH SHAPE USED		THIS	REGION	IS L	IS T

True or False 2

Traditional 6x6 sudoku rules apply. Along thermometers, digits strictly increase from the bulb end. Along arrows, digits sum to the digit in the attached circle.

In addition, cells with letters correspond to a true or false statement. Cells with even numbers must have true statements, and cells with odd numbers must have false statements. Reading the statements before beginning is strongly encouraged.

- A** This arrow could also be a thermometer with the bulb at the top and the tip at the bottom.
- B** The longest arrow should be upside-down with the circle at the top and arrowhead at the bottom.
- C** The longest thermometer and arrow should have their locations swapped.
- D** There are no odd digits on this thermometer.

I can't recall if I posted this to The Griddle already or not...

I've got meta-puzzles on the brain because my team The Providence Bureau of Invest-Egg-Ations recently won the 2026 MIT Mystery Hunt! Huzzah!

But as many readers may already know, the win comes with a hefty cost: we are now responsible for writing the 2027 hunt. Wish us luck...
